

POLIGONI IMPOSSIBILI

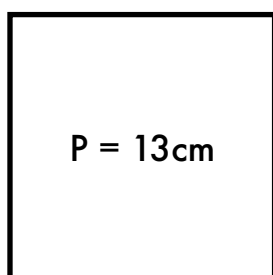

Marta ha calcolato il perimetro (P) di questi poligoni, ma ha commesso alcuni errori. Colora di verde i poligoni in cui il perimetro è corretto e di rosso quelli in cui il calcolo è sbagliato, poi correggili.

Ricorda: il perimetro del quadrato e del rombo si calcola moltiplicando la misura del lato per 4. Il perimetro del rettangolo si calcola moltiplicando per due la somma della base e dell'altezza.
